EDUCATION

- Academy of Technology** AdiSaptagram, India
 - Bachelor of Technology - Computer Science Engineering and Business Systems ; GPA: 8.28 Oct 2021 - May 2025
 - Courses:** Operating Systems, Data Structures & Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases
- ST. PAUL'S ACADEMY** Burdwan, India
 - ISC; PERCENTAGE: 86.25% Mar 2019 - Mar 2021
 - Courses:** Mathematics, Physics, Chemistry, English, Computer Science

SKILLS SUMMARY

- Languages** C++, JavaScript, Typescript, JAVA, SHELL, Python.
- Frameworks** ReactJS, NextJS, NodeJS, MERN, Tailwind CSS, CMS, ORM.
- Tools** Postman, GIT, MySQL, OracleSQL, PostgreSQL, Redis.
- Other Skills** Linux, Windows, Github, FireBase, Competitive Programming, Rest Apis.
- Soft Skills** Leadership, Event Management, Technical Writing, Time Management.
- Dialects** English, Bengali, Hindi.

EXPERIENCE

- Web Developer Intern** Bengaluru, Remote
 - GSi NEXT Nov 2024 - Dec 2024
 - Created a register and login system using JWT tokens and **MongoDB** and hashed using **bcrypt**.
 - Designed and implemented a dynamic booking system in the backend, ensuring seamless integration with salon and specialist availability schedules, **optimizing** user experience and efficiency.
 - Developed a real-time review system that **dynamically** updates with user inputs, **enhancing** feedback accuracy and overall salon service quality.

PROJECTS

- NPM Packages (Javascript, NodeJS, Express Js):** Built and published two NPM Packages. One works like a mock server and provides all types of APIs and data like users, products and posts for frontend users to try their websites without backend. The second one connects all types of databases with a single call removing the need of setting up a separate configuration file and going through the problems and errors. **alldbconnect.mock-serv.js** Jan - Feb 2025
- TradeP (NodeJS, PostgreSQL, Sequelize ExpressJS, Redis, MQTT):** TradeP is a high-performance, backend-only trading engine featuring auth, real-time order matching, market data processing, and caching using Redis and MQTT for real-time communication and order execution at fast speed with minimal latency. **Github Link.** Jan 2025
- PayP (NodeJS, PostgreSQL, Sequelize ExpressJS, JWT, Bcrypt):** PayP is a payment architecture based on UPI architecture, designed to accept payments and send them. It includes core features such as secure user accounts, balance management, transaction logs, and a lockout mechanism for failed login attempts. It provides a great alternative to Razorpay or Stripe for development since it completely works like UPI. **Github Link.** Live At: Payp Jan 2025
- ADGov (REACTJS, Tailwind CSS, NodeJS):** ADgov is a comprehensive platform designed to provide all government schemes, facilities, and scholarships under one roof. Deployed At: **ADGov.** **Github Link** Oct 2024

AWARDS AND CERTIFICATIONS

- Winner of **TechQuisitive 5.0[Quiz Contest]** and **CxthSense 2.0[Coding Contest]** in College
- Codechef rating - **2211** . Leetcode contest rating - **2157**
- Postman API Fundamentals Student Expert **Certificate**

VOLUNTEER EXPERIENCE

- Member of Prayukti[Ingenium's Technical Writing Division]** Oct 2023 - Present
 - Reviewing Different **Technical Articles** for College Magazine
- Member of IEI Student's Chapter CSBS** Aug 2023-Present
 - Organizing and hosting** different events in college
- Co-Founder of RESOURCIO COMMUNITY** Dec 2022-Present
 - Running a tech community with over **2000+ members** and numerous events.
- Event Coordinator - TechFiesta[Tech Fest of AOT]** Apr 2024
 - Hosted **TechFest of AOT** and event coordinator of **Maths** event.

EXTRAS

HOBBIES

- Reading Story Books, Photography, Image Editing(Learning), Watching Cricket and Football matches.
